Technical Specifications of True Digital Orthophoto (TDOP) Series

True Digital Orthophoto (TDOP) Series

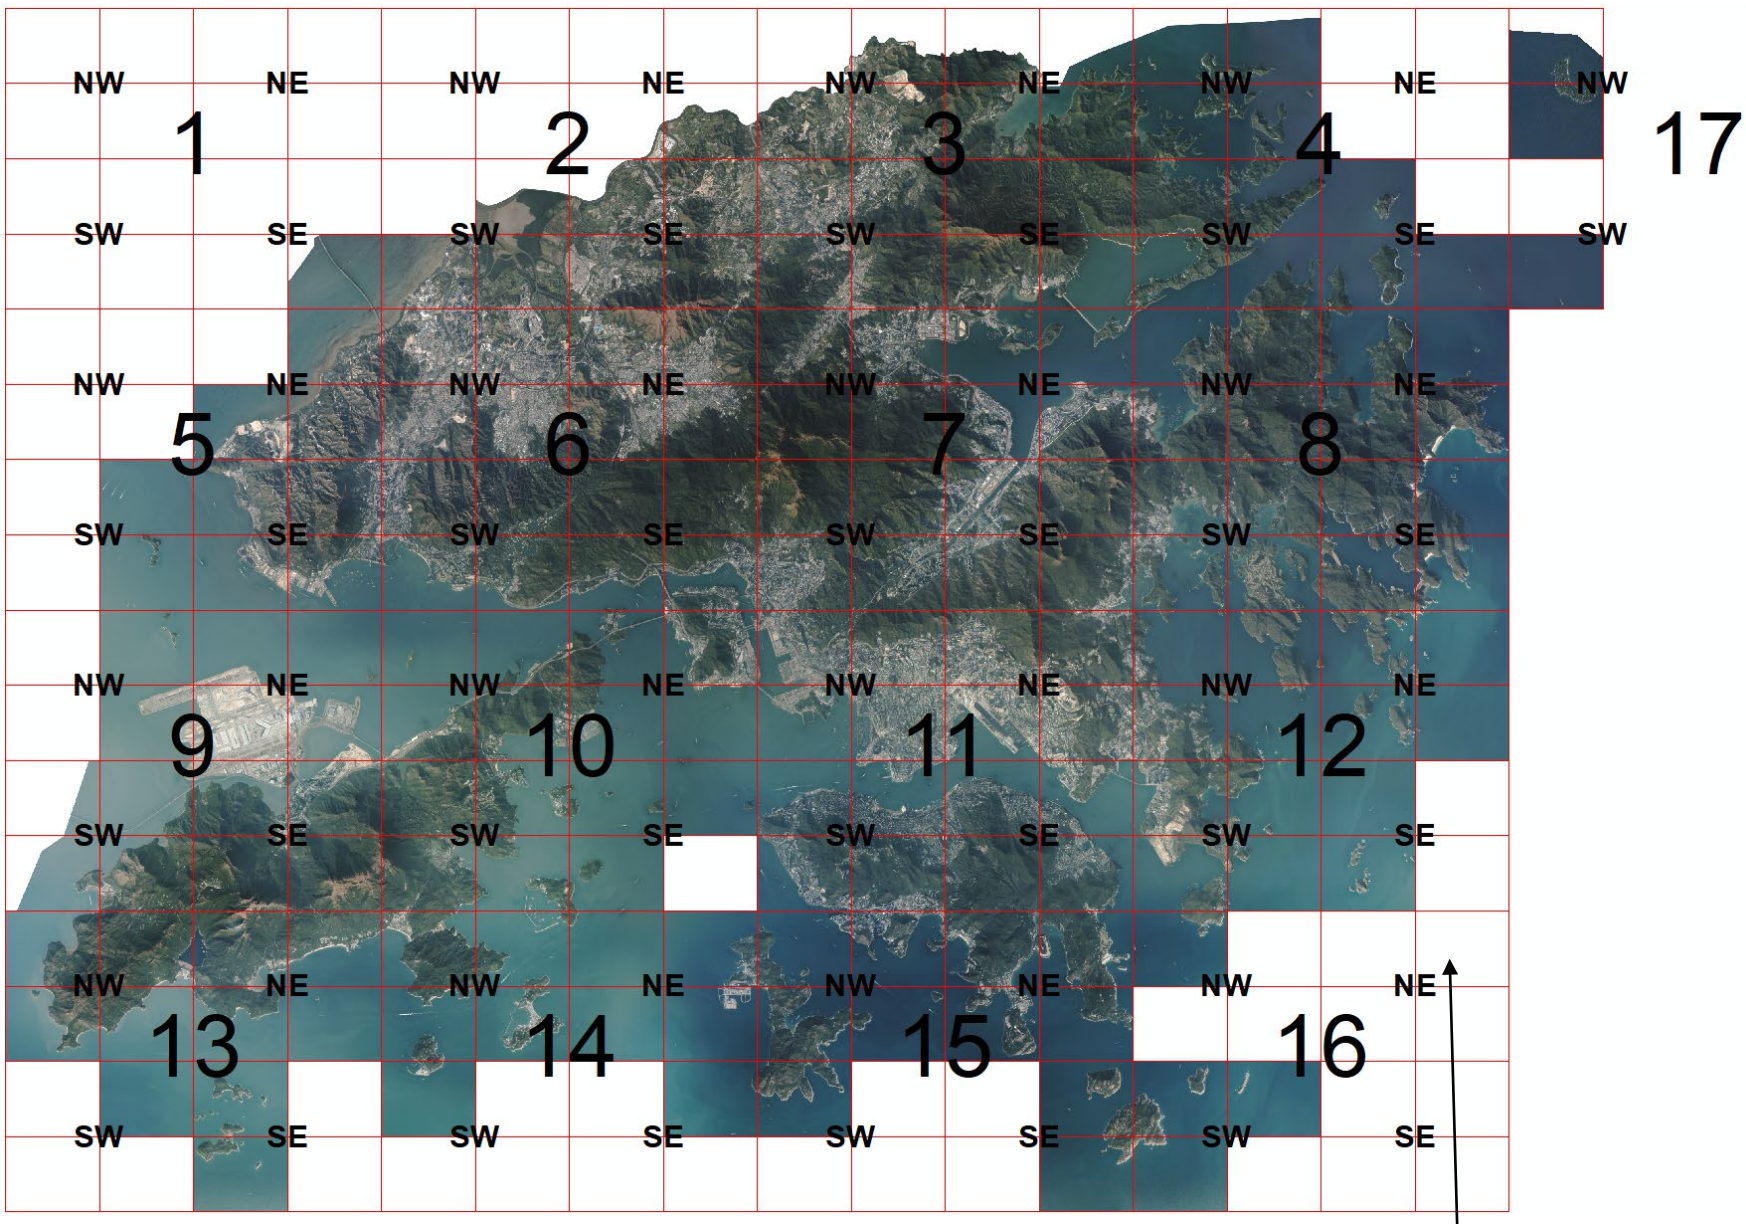

True Digital Orthophoto (TDOP) Series is produced from Digital Aerial Photo (UE Version) captured at flying height of about 13,000ft with ground sampling distance of 0.25m. Distortions of photographic images caused by tilting of aerial camera and relief are rectified. The production of the TDOP is highly automatic. Users should be aware that image distortions might appear at some areas of the TDOP (e.g. area around tall structures, shadows, narrow gaps, features mixed with vegetation and water bodies).

True Digital Orthophoto (Version December 2024 – January 2025) (TDOP (Dec 2024 – Jan 2025))

A full set of TDOP (Dec 2024 – Jan 2025) consists of 192 tiles of orthophoto generated from Digital Aerial Photo (UE Version) captured in December 2024 and January 2025 covering all the land area of Hong Kong Special Administrative Region (HKSAR) which tiles numbers: 1-SE-D; 2-SW-B; 2-SE-A; 2-NE-C&D; 3-NW-A, B&C; 3-NE-A, B&D; 4-NW-A; 9-SW-A and 17-NW-A cover areas beyond the boundary of HKSAR. Some portions of sea area images where they are not covered by suitable aerial photographs may be filled up with images of other sea area.

The tiles of TDOP (Dec 2024 – Jan 2025) are provided in GeoTiff (*.tif) including a world file (*.tfw) with geo-referencing data in Hong Kong 1980 Grid and the data file size of each tile is about 520 MB. For detailed information, please refer to "Index of True Digital Orthophoto (Version December 2024 – January 2025)", "Table of Updateness of True Digital Orthophoto (Version December 2024 – January 2025)" and "Table of File Name and Tile Extent of True Digital Orthophoto (Version December 2024 – January 2025)" as follows.
